Chapter 1 TI Calculator Basics1

Key Differences between the 83/84 series and the 89 series	1
Keyboard and Notation	1
Setting the Correct Mode	3
Screen Contrast Adjustment and Battery Check	4
A Special Word about the TI-89 Titanium	4
Home Screen Calculations	5
Sharing Data	6
Working with Lists	8
Using the Supplied CD-ROM Datasets	11
Memory Management	12
What Can Go Wrong?	13

Chapter 2 Displaying and Summarizing Quantitative Data..... 14

Histograms	14
TI-83/84 Steps	14
TI-89 Histograms	16
Histograms with Frequencies Specified	18
Calculating Numerical Summaries	18
Statistics for Tabulated Data	20
What Can Go Wrong?	20
Commands for the TI-Nspire™ Handheld Calculator	21

Chapter 3 Understanding and Comparing Distributions 25

Boxplots	25
Boxplots with Tabulated Data	26
Histograms to Compare Distributions	26
Time Plots	27
What Can Go Wrong?	28
Commands for the TI-Nspire™ Handheld Calculator	29

Chapter 4 The Standard Deviation as a Ruler and the Normal Model..... 30

Z-Scores	30
Working with Normal Curves	30
Working with Normal Percentiles	32
Is My Data Normal?	33
What Can Go Wrong?	35
Commands for the TI-Nspire™ Handheld Calculator	35

Chapter 5 Scatterplots, Correlation and Regression..... 38

Scatterplots	38
Regression Setup (TI-83/84 only)	39
Regression and Correlation	39
TI-83/84	40
TI-89	41
Residuals Plots	41
Using the Equation to Predict	43
Identifying Influential Observations	43
Transforming Data	44
What Can Go Wrong?	45
Commands for the TI-Nspire™ Handheld Calculator	46

Chapter 6 Random Numbers 49

Simulations	49
Controlling the Sequence of Random Digits	50
Random Normal Data	51
Sampling and Treatment Assignments	51
The ProbSim Application	51
Commands for the TI-Nspire™ Handheld Calculator	52

Chapter 7 Random Variables 54

What Can Go Wrong?	55
Commands for the TI-Nspire™ Handheld Calculator	55

Chapter 8 Probability Models 57

Geometric Models	57
Binomial Models	58
Poisson Models	60
What Can Go Wrong?	61
Commands for the TI-Nspire™ Handheld Calculator	61

Chapter 9 – Sampling Distribution Models63

Sampling Distributions for a Proportion	63
Sampling Distributions for a Sample Mean	64
What Can Go Wrong?	65

Chapter 10 Inference for Proportions66

Confidence Intervals for a Single Proportion	66
A Small Sample Confidence Interval	67
Hypothesis Tests for a Single Proportion	68
Confidence Intervals for the Difference of Two Proportions	70
Hypothesis Tests for a Difference in Proportions	70
What Can Go Wrong?	71

Chapter 11 Inference for Means	75
Confidence Intervals for a Mean	75
A One Sample Test for a Mean	77
Comparing Two Means – Confidence Intervals	78
Testing the Difference Between Two Means	79
Paired Data	80
What Can Go Wrong?	83
Commands for the TI-Nspire™ Handheld Calculator	83
Chapter 12 Comparing Counts	88
Testing Goodness of Fit	88
Testing Homogeneity	90
Testing Independence	93
What Can Go Wrong?	94
Commands for the TI-Nspire™ Handheld Calculator	95
Chapter 13 Inference for Regression.....	97
A Confidence Interval for the Slope	97
A Confidence Interval for the Mean at Some x	97
A Prediction Interval for a New Observation	98
A Program for Regression Inference (TI-83)	98
What Can Go Wrong?	99
Program LSCINT Listing	100
Commands for the TI-Nspire™ Handheld Calculator	102
Chapter 14 Analysis of Variance	105
TI-83/84 Procedure	105
TI-89 Procedure	106
Another Example	107
Commands for the TI-Nspire™ Handheld Calculator	109
Chapter 15 Multiple Regression.....	112
TI-83/84 Procedure	112
TI-89 Procedure	113
Assessing the Model	115
Multiple Regression Confidence Intervals	116
What Can Go Wrong?	117
Program MULREG Listing (TI-83/84)	118
Commands for the TI-Nspire™ Handheld Calculator	120
